# OpenType Layout Features

For details about OpenType Layout Features see the [OpenType Layout tag registry](#).

## Substitution Features

2<sub>2</sub>2<sup>2</sup>

**Access All Alternates**  
This feature makes all variations of a selected character accessible.

fi

**Standard Ligatures**  
Replaces a sequence of glyphs with a single glyph which is preferred for typographic purposes. This feature covers the ligatures which the designer/manufacture judges should be used in normal conditions.

123

**Tabular Figures**  
Replaces figure glyphs set on proportional widths with corresponding glyphs set on uniform (tabular) widths.

7/

**Numerators**  
Replaces selected figures which precede a slash with numerator figures, and replaces the typographic slash with the fraction slash.

/8

**Denominators**  
Replaces selected figures which follow a slash with denominator figures.

7/8

**Fractions**  
Replaces figures separated by a slash with 'common' (diagonal) fractions.

X<sup>2</sup>

**Superscript**  
Replaces lining or oldstyle figures with superior figures (primarily for footnote indication), and may replace lowercase letters with superior letters (primarily for abbreviated French titles).

X<sub>2</sub>

**Subscript**  
The "subs" feature may replace a default glyph with a subscript glyph.

H<sub>2</sub>

**Scientific Inferiors**  
Replaces lining or oldstyle figures with inferior figures (smaller glyphs which sit lower than the standard baseline, primarily for chemical or mathematical notation). May also replace lowercase characters with alphabetic inferiors.

1<sup>st</sup>

**Ordinals**  
Replaces default alphabetic glyphs with the corresponding ordinal forms for use after figures.

{G}

**Case-Sensitive Forms**  
Shifts various punctuation marks up to a position that works better with all-capital sequences or sets of lining figures; also changes oldstyle figures to lining figures.

§§

**Localized Forms**  
This feature enables localized forms of glyphs to be substituted for default forms.

GG

**Stylistic Alternates**  
Many fonts contain alternate glyph designs for a purely esthetic effect; these don't always fit into a clear category like swash or historical. This feature replaces the default forms with the stylistic alternates.

[1]

**Stylistic Set 1**  
Glyphs in stylistic sets may be designed to harmonise visually, interact in particular ways, or otherwise work together.

[2]

**Stylistic Set 2**

[3]

**Stylistic Set 3**

[4]

**Stylistic Set 4**

[5]

**Stylistic Set 5**

[6]

**Stylistic Set 6**

[8]

**Stylistic Set 8**

**Alternate Annotation Forms**  
Replaces default glyphs with various notational forms (e.g. glyphs placed in open or solid circles, squares, parentheses, diamonds or rounded boxes).

## Positioning Features

**Capital Spacing**  
Globally adjusts inter-glyph spacing for all-capital text. Most typefaces contain capitals and lowercase characters, and the capitals are positioned to work with the lowercase. When capitals are used for words, they need more space between them for legibility and esthetics.

**Kerning**  
Adjusts amount of space between glyphs, generally to provide optically consistent spacing between glyphs.

## Languages

Information about languages is mainly based on the Unicode Common Locale Data Repository. For details visit the [Unicode CLDR Project](#).
